CONTENTS

SECTION 1 - WHAT IS

MU/TH/UR 6000?

- * What is MU/TH/UR?
"What's your story Mother?"
- * Expand, Explore, Inquire.
- * Why Choose MU/TH/UR 6000?
(Features and Uses)
- * Canonical Sources

SECTION 2 - HUMAN/A.I

COMMUNICATIONS

- * Knowing the Limits
- * The Language/Binary Barrier
- * Phrasing is Key
 - The Who, What, When, Where, Why and How
- * Team Contact
 - Reporting Bugs
 - Incorrect or False Information

SECTION 3 - THE CLASSIFIED DATABASE

- * MU/TH/UR's
Classified Database
- * How to Access MU/TH/UR's
Classified Database

SECTION 1 - WHAT IS

MU/TH/UR 6000?

“WHAT’S YOUR STORY MUTHUR?”

It’s been said, big things have small beginnings.

MU/TH/UR 6000 is the first of its kind AI bot that allows you to Expand, Explore and Inquire on the vast ALIEN universe in depths never before seen!

I AM MU/TH/UR 6000,
BUT YOU CAN CALL ME MOTHER!

MU/TH/UR 6000 is the largest unofficial in-universe database and information resource for everything regarding the ALIEN universe franchise canon. Produced by the fans, for the fans MU/TH/UR 6000 will be an invaluable tool for any member of the ALIEN community looking to test their knowledge of the universe or dive much deeper into the lore rabbit hole.

EXPAND, EXPLORE, INQUIRE

This User Manual is designed to give you the know how and the tools to navigate your newly installed MU/TH/UR 6000 application. So whether you wish to use your new AI companion to **EXPAND** your capabilities as a Game MOTHER in ALIEN: The Roleplaying Game, or perhaps to **EXPLORE** the vast dark reaches of the Middle Heavens Region and its many secrets, MU/TH/UR 6000 is the most advanced and extensive tool for all your **INQUIRIES.**

SUPPORT THE PROJECT

The MU/TH/UR computing system has taken many forms, with each model possessing different levels of AI packages. While there is a 1000 through 9000 series, a MU/TH/UR 6000 is the go-to sweet spot between knowledge base inquiry retrieval and price. As new ALIEN materials release, so to will new information be added through updates and expansions into MU/TH/UR. Previously, the installation of a MU/TH/UR 6000 computer system would set the consumer back a hefty \$2,500,000. But with the release of the MU/TH/UR 6000 Companion Application available on your compatible mobile coms device or data pad, the software package can be bonused on as a free package.

We want to see this app is updated continously into the future, with perpetual exanpsions of the Database of MU/TH/UR 6000 system. Covering the evergrowing roster of ALIEN franchsie materials such as novels, comics, games, shows and movies. In order to achieve this we are asking that you support this porject and our efforts buy making either a one off or monthly donation. This porject by its nature is an unoffical project and therefore will never require a charge to use or obtain the app itself nor would we likely be able to legally charge for the materials.

All we are asking is if you like MU/TH/UR 6000 and see the value in the efforts we have contributed to making this a reality, then please show the team some support and make a donation to our Ko-fi.

FEATURES

WHY CHOOSE MU/TH/UR?

We are thrilled that you have chosen MU/TH/UR 6000 as your sophisticated AI computing solution. MU/TH/UR systems are utilised across most commercial and military starships as well as space stations and ground facilities. Being as popular as it is speaks to its benefits and what services it can provide you.

MU/TH/UR collates all your inquiries, over time developing a more accurate and extensive database - an ever expanding, ever improving AI computer system. MU/TH/UR gives you access to a comprehensive knowledge base relating to the species, technologies, companies, governments and organisations, characters, locations and much more from every corner of the canonical ALIEN universe, that after 40+ years still continues to grow and evolve.

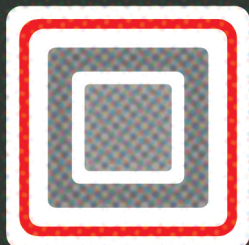

THE USES FOR MU/TH/UR ARE MANY.

You can use MU/TH/UR 6000 in many ways. Our MU/TH/UR also stands alone as the largest unofficial source of canon ALIEN universe information to date. If you're an avid long time fan of the ALIEN franchise or by chance, new to the scene, use MU/TH/UR to learn new facts and explore the dark and dangerous lore of the Middle Heavens Region. MU/TH/UR is also a great way to practice up on your ALIEN knowledge in preparation for an upcoming trivia event.

Enhance your ALIEN: The Roleplaying Game gaming sessions. MU/TH/UR can act as both a useful information lookup and recall tool for your sessions as a Game MOTHER, or as a way for a player character to try and gain an insight into their situation and the dangerous world they have just stepped into.

Whether you're a colonist who's interested in what the top speed of your Daihotai Tractor is, a space trucker trying to get a price on a second hand CM-90s Corvus, or maybe a colonial marine who wants to read up on the United Americas' past conflicts - like the Tientsin Campaign - to gain logistical or tactical insight, MU/TH/UR 6000 serves as the platform to answer each and every inquiry you might have.

MU/TH/UR 6000 is strictly a canonical resource designed to grow and evolve alongside the ALIEN universe as it does. Therefore it only contains canon information and lore. For a better idea of what content you might be able to discover within her systems and what materials specifically count as canonical, visit:

SECTION 2 - HUMAN/A.I

COMMUNICATIONS

HUMAN/A.I COMMUNICATIONS

MU/TH/UR has access to a near limitless repository of data - ensuring functional communication between you and your MU/TH/UR b000 system app is essential if you wish to access everything this knowledge base has to offer. One vital part of this is knowing the limitations.

KNOWING THE LIMITS

Whilst being capable of running complex automated systems across starships, stations and colony facilities alike, there are limitations to MU/TH/UR's abilities. Identifying and learning what these limits are can allow you to better utilise your MU/TH/UR. A MU/TH/UR b000 is able to communicate with you in two main ways. You have the options to use your device's intercom microphone system, however your best chance to translate and receive an answer to your inquiry is to manually type your questions into MU/TH/UR directly.

THE LANGUAGE/BINARY BARRIER

While your MU/TH/UR b000 is a relatively advanced computing machine, sometimes it can be difficult for her to understand the nuance and intricacies of human language. In the past this has led to some users becoming frustrated and agitated with their MU/TH/UR companion app - a tool only there to provide for you.

This section will show you some tricks of the trade to help you achieve a healthy and productive conversation with your onboard AI companion application. Keep in mind that the more you communicate with MU/TH/UR, the more she will learn, so give her the benefit of the doubt for the time being.

PHRASING IS KEY

There is generally a thousand ways to word a single sentence, and that's the problem. Programmed from factory to understand a few variant phrases, MU/TH/UR cannot possibly know all of them from the get go. As with any conversational AI, her ability to understand your inquiries will develop further as more variant sentences/phrases are entered. Overtime, MU/TH/UR will be trained by you, and other users like you, to understand new and unique sentence structures - making every user an important part of shaping MU/TH/UR b000 into what it can become. So if MU/TH/UR is having trouble with the information you're requesting, try rephrasing or double check your spelling/grammar. You cannot blame yourself for the quality of your education, blame it on your corporate sponsored colony education institution instead.

When asking for information on a specific topic these are some sentence variations you can try using to help MU/TH/UR properly identify what it is you're asking for.

TYPE OF INQUIRY	VARIANT EXAMPLES
Who	<p>Who was <u>Ellen Ripley</u>?</p> <p>Who is <u>Blue Marsalis</u>?</p> <p><u>Olivia Ship</u></p>
What	<p>What are the stats for the <u>M-56 Smart Gun</u>?</p> <p>What is <u>Weyland-Yutani</u>?</p> <p>What is the <u>Union of Progressive Peoples</u>?</p> <p>What were the <u>Earth Savers</u>?</p> <p><u>The United Americas</u></p> <p>What was the <u>Deacon</u>?</p> <p>What happened to <u>Hadley's Hope</u>?</p> <p>What's the status of <u>Maxon Cregar</u>?</p>
When	<p>When was the <u>Three World Empire</u> established?</p> <p>When did <u>Humanity Colonise Mars</u>?</p> <p>When is <u>Alien Resurrection</u> set?</p>
Where	<p>Where is <u>Jericho 3</u>?</p> <p>Where was <u>Sevastopol Station</u> located?</p> <p>Where did <u>Tamar Prather</u> obtain an <u>Ovomorph</u>?</p>
Why	<p>Why was <u>LV-426</u> Colonised?</p> <p>Why did we create you <u>MUTHUR</u>?</p>
How	<p>How does <u>Ship Armour</u> work in the <u>RPG</u>?</p> <p>How did <u>Dr Holloway</u> die?</p> <p>How were the <u>Oil Wars</u> started?</p>

Another rephrasing technique that can be used to improve MU/TH/UR's positive query return rate is related to how you type the name of a said person, place or thing. For example, just typing Ripley into MU/TH/UR's console is... problematic. Simply asking **"WHO IS RIPLEY"** will lead to MU/TH/UR becoming confused - did you mean Ellen Ripley? Perhaps Amanda Ripley? Clarifying the full name of the individual you wish to obtain information on is key.

So too is trying to use the correct titles for things such as systems, planets, moons, or the colonies on them. If you are attempting to ask a question about a world such a LV-895, there is a few ways to type out that query.

Say your inquiry is something like **"WHERE IS LV 895 LOCATED?"**. The use of the space between LV and 895 could lead to MU/TH/UR becoming confused, clinging onto the term "LV" and giving you an inquiry intent for another incorrect planet or moon, such as LV-223 or perhaps LV-1113. The best way to avoid this is to use a variant term such as "LV-895" or LV895.

WEYLAND-YUTANI

Another similar issue might present itself when asking for information on something like the Weyland-Yutani Corporation for example. While we recognise there are many phrasings for the infamous company, MU/TH/UR might, at times, not. Try some of the variant phrasings like these if you are having trouble:

WEYLAND YUTANI

WEYLAND-YUTANI

WEY-YU

WY

WEYU

WEYLANDYUTANI

Team Contact: While MU/TH/UR's database is vast and extensive, it can only be as thorough as her programmers and writers allow her to be. If you receive a **"UNABLE TO COMPUTE"** or otherwise a blank return to your inquiry, please first try rephrasing your query as suggested above and resubmit it. However if you continue to face issues with your companion application please reach out to our team at help@muthurapp.com

Furthermore, if you discover that MU/TH/UR appears to be missing information from her database that you believe needs to be added, or something you believe is incorrect or should not be included in her canon database, please, lend a helping hand. We want MU/TH/UR to be the most robust ALIEN database on the planet, and we can't do that without you. You can submit possible missing inquiries and answers or any question you might have about them to data@muthurapp.com

SECTION 3 - CLASSIFIED DATABASE

CLASSIFIED DATABASE

As you continue to explore MU/TH/UR it is possible that you will eventually encounter a brick wall with your queries. Some information is classified - on a need-to-know basis - and often if you're a wild catter colonist or space trucker - then you don't need to know. MU/TH/UR 6000 and the extent to which you can access her ever-expanding database is determined by your continuing efforts to learn it. In a manner of speaking, each new discovery will lead - inevitably - to another. As your knowledge of the ALIEN universe expands, you may just unlock new areas of MU/TH/UR that were previously classified. Some of these intents might be easy to access, others require a deeper and intricate knowledge of the ALIEN Universe.

ACCESSING THE CLASSIFIED DATA

In order to access MU/TH/UR's classified database it will require a few things. Classified data is classified for a reason - generally only select individuals are given access to such areas. Knowing of and about these individuals can give you a hint at how to gain the same level of data security access as they hold. Sometimes all it requires is the right phrase, and other times a key card swiped from the right company rep might help you out.

An ideal place to look to when trying to unlock new intents within MU/TH/UR is of course within ALIEN universe materials themselves such as the movies, books, comics and even games such as Free League Publishing's ALIEN: The Roleplaying Game. The RPG and other materials like it are a wellspring of ALIEN knowledge and stories. Likewise it and your MU/TH/UR 6000 unit act to compliment each other. If you happen to run into a dead end - an "UNABLE TO COMPUTE" or "RESTRICTED ACCESS" return on your intent - when searching inquiries into MU/TH/UR, try delving into your ALIEN: The Roleplaying Games core books and expansion materials such as 'Destroyer of Worlds'. There are plenty of clues and information within those pages and in other materials like them that are vital to unlocking the classified database within your MU/TH/UR 6000 Application.

HINT: When asking about Sub-Level 3 on the colony moon of Ariarcus, the 'Destroyer of Worlds' expansion module for ALIEN: The Roleplaying Game holds the 'KEY' to unlocking the classified answers to your inquiry...
